## INTRODUCTION

The Australian Bureau of Statistics is the official statistical organisation for the Commonwealth and State Governments. Its main function is to provide government and the community with an efficient, user-oriented national statistical service.

### How to use this Catalogue

This Catalogue refers to products which ABS Canberra and State Offices have issued since 1 January 1986, or expect to release during 1990. The Catalogue is divided into three parts.

**Special Products and Services** are described in *Part 1*.

**Standard Products** are listed in *Part 2*, together with abstracts and other reference information. Part 2 is in numerical order except that within each two-digit subject group, the Central Office (Canberra) entries precede the State Office entries (see description of numbering system below). Most publications issued by Central Office contain separate statistics for States and Territories as components of Australian totals. In addition, more detailed State-specific data are released in a number of publications.

**Indexes** are shown in *Part 3*. They include indexes by medium of release for non-printed products, indexes for State publications and titles, and a detailed subject index in alphabetical order. If you are interested in a particular subject area, e.g. foreign trade, employment, etc., you may find it convenient to identify the range of publications from the list of subject groupings in the contents pages and by this means gain access to all publications within that subject. If, on the other hand, you have a specific interest, e.g. the production of butter and cheese, industrial disputes, etc., it may be convenient to first check the detailed subject index beginning on page 279.

### The ABS Catalogue numbering system

The system consists of a five digit code (e.g. 4101.0).

The *first two digits* define the subject. There are nine broad areas (e.g. 4 represents social statistics), each of which is divided into a number of more precise subdivisions (e.g. 43 is health).

The *third and fourth digits* are serial numbers which are permanently allocated to publications within categories formed by the first two digits. An allotted number will remain unchanged provided the contents of a publication remain essentially the same.

The *fifth digit*, after the full stop, represents the State or Territory covered by the statistics.

The codes for each State and Territory are:

0	Australia
1	New South Wales
2	Victoria
3	Queensland
4	South Australia
5	Western Australia
6	Tasmania
7	Northern Territory
8	Australian Capital Territory

### Information on ABS releases

Currently the ABS publishes approximately 500 individual statistical titles each year. To supplement this Catalogue, clients may keep up-to-date on recent releases by obtaining the monthly publication *Publications Issued in (name of the month)* (1102.0). This can be

obtained by contacting the ABS office in your capital city (*see back cover*). Releases are also listed in the *Statistics Weekly* (1318.0), the *Monthly Summary of Statistics, Australia* (1304.0), and the *Publications Advice* (1105.0) which is issued Tuesdays and Fridays. The *Publications Advice* gives the titles of all ABS publications expected to be released in the next few days. The last issue of the *Publications Advice* of each month also contains a list of main economic indicator publications expected to be released in the forthcoming month, and the planned dates of their release. Details of publications expected to be released in the next few days are also available on VIATEL and the Dial-a-Statistic Services.

## **How to obtain products**

## SUBJECT INDEX

This index is designed to assist in determining which ABS publications are relevant to various subjects of specific user interest.

Subject headings are followed by the catalogue number. The relevant page numbers to refer to in this catalogue are also shown (in parentheses).

Most publications issued by Central Office contain separate statistics for States and Territories as components of Australian totals. In addition, more detailed State-specific data are released in a number of publications. These have a fifth digit representing the State or Territory covered by the data. The digits are as follows:

- |   |                              |
|---|------------------------------|
| 0 | Australia                    |
| 1 | New South Wales              |
| 2 | Victoria                     |
| 3 | Queensland                   |
| 4 | South Australia              |
| 5 | Western Australia            |
| 6 | Tasmania                     |
| 7 | Northern Territory           |
| 8 | Australian Capital Territory |

No references are given in this index for Australian and State Year Books (1300.0 – 1301.6) or Pocket Year Books (1302.0 – 1302.6) as each of these publications contains a detailed index. The Year Books should be regarded as the principal general statistical reference works produced by the ABS.

The index is not intended as a comprehensive index of commodities or items covered in the statistics. Particular items of production and overseas trade are largely omitted. Users should, for example, consult the publication *Manufacturing Commodities, Principal Articles Produced, Australia* (8303.0) which contains a detailed alphabetical index of commodities produced in Australia.
